	7(2)(a)(ii)	Use of a machine that is constructed in such a way that it cannot be adequately cleaned, disinfected and maintained to avoid the contamination of the milk	R2500
	7(2)(a)(iii)	Use of a milk machine which is not equipped with a device rendering visible the milk flow from each milk animal.	R2500
	7(2)(a)(iv)	Use of a milk machine which do not comply with Sub-regulations (1)(a), (b), (d) and (c).	R5000
	7(3)(a)(i)	Use of a bulk farm tank which does not have drainage incline leading directly to the outlet point.	R2500
	7(3)(a)(ii)	Use of bulk farm tank which is not fitted with outlet pipe manufactured and fitted in such a way that all liquid can drain out of such tank, and screw-threaded at the end and fitted with screw-on cap permitting such end to be shut off.	R2500
	7(3)(a)(iii)	Use of bulk farm tank which is not fitted with an automatic stirring mechanism capable within five minutes of being put into operation, of mixing milk in such tank.	R2500
	7(3)(a)(iv)	Use of bulk farm tank which is not fitted with a thermometer capable of measuring the temperature of the milk in such tank to 2˚C	R2500
	7(3)(a)(v)	Use of a bulk farm tank which is not equipped to cool the milk in such tank to 5˚C or a lower temperature within three hours, and of effectively keeping such cooled milk at a temperature of between 1˚C and 5˚C.	R2500
	7(3)(a)(vi)	Use of bulk farm tank which is not installed a minimum distance of 0,5 metres from any ceiling, roof or wall.	R2500
	7(3)(a)(vii)	Use of a bulk farm tank that is designed in such a way that it is not insulated in a way that when no cooling takes place, the temperature of the milk in such tank shall not increase by more than 3˚C in twelve hours if the surrounding temperature is 32˚C	R2500
	7(3)(b)	Use of a bulk farm tank which do not comply with Sub-regulation (1)(a), (b)(c) and (d).	R5000

OFFENCE CODE	NUMBER OF REGULATION	DESCRIPTION OF OFFENCE	PROPOSED FINE
	7(3)(c)	Use of a bulk farm tank that is designed in such a way that it does not allow for maintenance, cleaning, disinfection, monitoring, and, to facilitate inspection.	R2500
	7(4)(a)(i)	Use a tank of a milk tanker which is not installed in such a way that it has incline leading to the outlet pipe so that the total contents of such tank drain out of the tank while the vehicle is in a horizontal position.	R2500
	7(4)(a)(ii)	Use a tank or milk tanker which is not insulated in such a way that the temperature of the milk in such tank shall not increase by more than 2˚C every 48hours.	R2500
	7(4)(a)(iii)	Use a tank or milk tanker which does not have at least one opening fitted with a dust-proof lid through which the inside of such tank can be inspected and is not equipped so that all surfaces which come into contact with milk may be washed and disinfected.	R2500
	7(4)(c)	Use a tank or milk tanker which do not comply with Sub-regulations (1)(a), (b), (c), (d) and (3)(c).	R5000
	7(5)	Failure to wash and disinfect after use Milk containers or other fixed and unfixed apparatus and equipment so that they are clean, that fats and milk residues are dissolved and that the bacteriological count on surfaces coming into contact with milk does not exceed 10 bacteria per 100 mm	R2500
	8(1)	Fail to keep milk that shows signs of abnormality after testing separate from other milk or using such milk for human consumption.	R2500
	8(2)	Adding of milk obtained from dairy stock during the first seven days following parturition to milk obtained for human consumption.	R2500
	8(3)	Transferring of milk from one milk container to another by means of a third container.	R2500
	8(4)	Fail to protect milk from direct sunlight.	R2500
	8(5)	Fail to transfer milk to the milk-room immediately after the dairy stock has been	R2500

OFFENCE CODE	NUMBER OF REGULATION	DESCRIPTION OF OFFENCE	PROPOSED FINE
		milked.	
	8(6)	Fail to cool milk within 3 hours of being received in the milk-room to a temperature of 5˚C of lower but above freezing point and keeping it at such temperature until it is removed from the milking shed.	R2500
	9(1)	Fail to mark every milk animal with a distinguishing and indelible mark by which such animal can be identified.	R2500
	9(2)	Fail to keep a register as contemplated in Regulation 9(2)	R2500
	9(3)	Fail to have each individual milk animal examined by a Veterinary Surgeon at least once in every two-year cycle and to obtain a report from the Veterinary Surgeon.	R2500
	9(4)	Making available milk obtained from an ill animal or animal that appears to be ill for human consumption.	R2500
	9(5)	Making available milk obtained from an animal which suffers from any of the conditions stipulated in Regulation 9(5) for human consumption	R2500
	9(6)	Fail to keep substances and materials used in the milking process or on dairy stock in containers that are free of foreign matter and dirt, and to cover such containers when not in use with tight-fitting lids.	R2500
	9(7)	Fail to ensure that all flanks, udders, bellies and tails of dairy stock are free of visible dirt before the milk process.	R2500
	10(3)	Fail to ensure that the hands and fingernails of every milker or handler of milk is washed thoroughly with soap and water, and that there are no accretions of grime under the nails when milk is handled.	R2500
	10(4)	Fail to ensure that each person handling milk dons clean and undamaged over-clothes and gumboots and on daily basis before commencement for activities and further to ensure that he wears them continuously while he is handling milking.	R2500

OFFENCE CODE	NUMBER OF REGULATION	DESCRIPTION OF OFFENCE	PROPOSED FINE
	10(5)(a)	Allowing a person who suffers from a communicable disease or who has an open sore or abscess on his arms, hands, head or neck to handle milk.	R2500
	11(1)(a)(i)	Failure of a driver of a vehicle loading milk that is not already packed in its final retail packing at milking shed for transport to a further distribution point or processing point to carry out an alizarol test (68% alcohol) on a sample of the milk to be loaded.	R2500
	11(1)(a)(ii)	Failure of a driver of a vehicle loading milk that is not already packed in its final retail packing at milking shed for transport to a further distribution point or processing point to take the temperature of the milk in the bulk farm tank, and/or should the Alizarol test be positive or if the temperature of such milk in the bulk farm tank exceeds 5˚C, to accept such milk for transport.	R2500
	11(3)	Failure of a driver of a vehicle loading milk that is not already packed in its final retail packing at a milking shed for transport to a further distribution point or processing point to ensure that a milk tanker or milk container is so cleaned and disinfected as soon as all milk has been unloaded there from, that the bacteriological count on the surfaces coming into contact with milk does not exceed 10 bacteria per 100mm^2 of such surfaces after disinfection.	R2500
